### Rimuel Loking

Hello! I'm currently studying at National Teachers College in the *Bachelor of Science in Information Technology (BSIT)* program. I have a growing interest in exploring AI, ML, as well as programming. I enjoy learning new things, especially when it comes to advancing my skills in technology.

#### Future Plans and Ambitions

- Further enhance my tech **skills and knowledge**
- Own a business/company
- Travel accross the world
- Successfully retire
- Enjoy Life with Family

#### The Business Blueprint

I plan to start an online platform that features trending and popular food from different places, where customers can easily order and pay through the app or website. The platform will allow the people try famous trending foods without needing to travel far or wait in long lines. For example, customers who want to try viral foods like Sherbet ni Chris Brown or Hungarian ni Neneng B can simply order them online. This platform will be designed for food lovers and busy individuals who want convenient access to trending food while also helping small food vendors reach more customers.

#### Media and Links

The companies that inspired me when it comes to broad technology:
